

SOLARMOUNT® BUTYL

SIMPLIFIED FLASHLESS SOLUTION

- The simplified design can be used under any rail system and is optimized and certified with the Unirac SOLARMOUNT® system.
- Minimize labor with one step installation using the pre-applied, peel and install, butyl design.
- One-step butyl application
- Reliable waterproofing without the need for additional sealants
- Industry-leading temperature range
- Eliminate risk of roof damage. No more disturbing shingles.

DUAL MOUNTING OPTIONS

- Pre-attached butyl pad: Simply peel, stick, and fasten with the two (2) included screws for rafter mount
- For direct-to-deck applications, simply install additional decking screws.

ADDITIONAL BENEFITS

- Mill and Dark Finishes
- Option for extra cross-course butyl patches
- Competitively priced with standard rafter attachments

WHY SOLARMOUNT® BUTYL?

Unirac's SOLARMOUNT® Butyl is efficient, dependable, and optimized for UNIRAC's SOLARMOUNT™ system. The pre-applied butyl pad removes the need for additional flashing. Just peel the liner, place the attachment, and fasten it to the roof. In addition, the butyl, used throughout the roofing and solar industries for its reliability, conforms to the screws and roof for a robust, dependable seal with no extra work! Optimized for SOLARMOUNT, the SOLARMOUNT BUTYL attachment can be used with any rail system, providing a highly reliable, easy-to-install solar solution.

KITTED WITH

- ONE (1) SOLARMOUNT® Butyl direct-to-deck attachment with pre-applied butyl patch. (Extra patches for shimming available.)
- TWO (2) screws for rafter installation (Additional screws for direct-to-deck applications available.)
- ONE (1) Rail T-bolt
