

SOLARMOUNT® - UNIRAC'S FULLY DOMESTIC SYSTEM

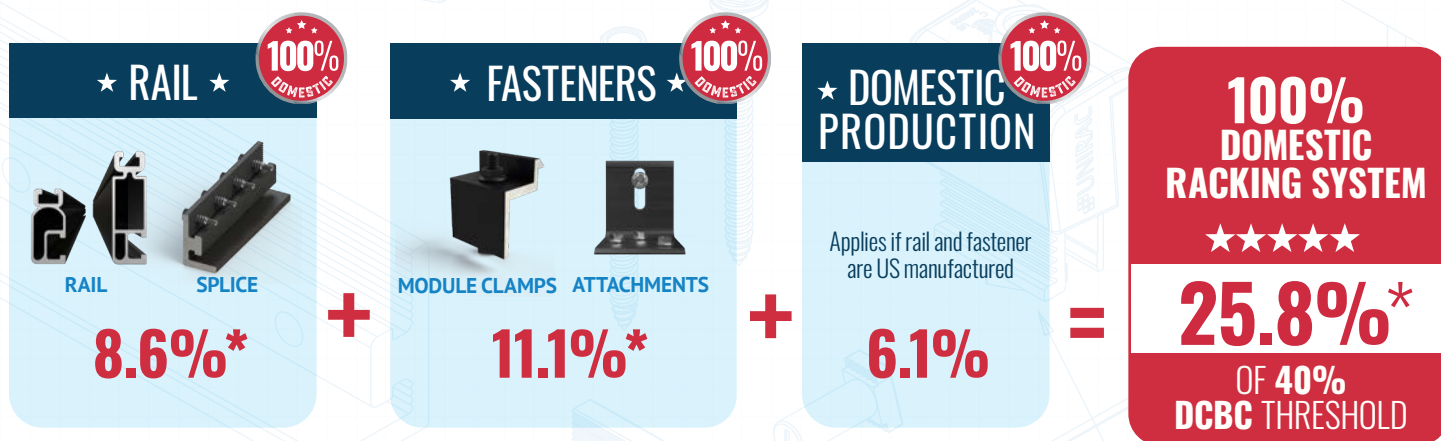

UNLOCK MAXIMUM SAVINGS WITH SOLARMOUNT®

SolarMount® is a U.S.-made racking system that incorporates 100% domestic content, making it one of the only full PV racking systems that qualify for the extra 10% Domestic Content Bonus Credit (DCBC).

Under the IRS's new Safe Harbor Guidance, SolarMount® racking systems may contribute up to 25.8% of the total 40% domestic content requirement for a complete PV installation. When paired with select domestic content inverters on the market, the SolarMount® racking system plays a pivotal role in meeting the 40% domestic content threshold.

Unirac's SolarMount® system is proudly manufactured in the USA, ensuring exceptional quality through domestic production!

**The content provided in this bulletin is for informational purposes only; it is not tax advice. Unirac cannot provide, and is not providing, tax advice regarding DCBC eligibility, which depends on several factors. As the Safe Harbor Guidance does not provide a specific definition for "rail" or "fasteners," the information provided here is Unirac's good faith interpretation of these terms as of the publishing date of this bulletin, and that interpretation cannot be relied on for claiming the DCBC. Unirac makes no representation or warranty that any customer or taxpayer will be able to claim the DCBC if it purchases Unirac domestic components. Not all parties can claim the domestic content bonus. Customers must consult their own tax advisors to determine eligibility.*
